Panther Introduces Its iPANTHER Solution

Panther Announces iPANTHER

Vancouver, WA, USA – Today Panther Systems announced the release of their new web-based delivery solution, *iPANTHER*.

iPANTHER, the latest addition to Panther Systems suite of products, is a centralized business intelligence solution which consolidates, organizes and clearly presents company enterprise data. It includes the capability for automatic notification of key events, monitoring and alarming to help companies view and evaluate critical corporate data.

The software solution is built on a .NET framework, is designed to meet Sarbanes Oxley requirements and utilizes drag and drop technology as seen on the web.

The product is designed to work for any business, product or service.
